

Corby Business Academy

Dance Rationale

The Dance curriculum at Corby Business Academy is all about student's creativity. We aim to instil confidence, teamwork, self-management and reflective working. Our students are exposed to the techniques of contemporary and Jazz dance as well as choreographic principles and an appreciation of the performing arts industry.

Students will learn to perform to an audience, lead and manage groups to create choreography and gain the skills to analyse their own and others work. Older students will have the opportunity to run extra-curricular dance companies which will support them with some excellent skills for UCAS applications.

The Dance department is a very inclusive department and encourages students to participate in the dance courses and the extended curriculum no matter their previous dance experience. As long as a student has a passion for dance we can develop the physical and interpretive skills they require to be successful.

Assessment for our courses is mainly coursework based and involves both practical and written elements
