

Urban Environments		
Week Commencing	Learning	Assignment completion
15 th June	<ul style="list-style-type: none"> Urban Environments Settlements can range from small hamlets to very large cities. They can be identified by their pattern or the functions they offer. Some settlements have altered over time. 	<p>Work book</p> <p>To know the different settlement types and how they are different.</p> <p>To understand the different settlement patterns and land use.</p> <p>To know how urban areas have changed over time.</p> <p>To know how regeneration is changing some urban areas.</p> <p>Links</p> <p>https://www.bbc.co.uk/bitesize/guides/z2dmn39/revision/1</p>
Ecosystems		
Week Commencing	Learning	Assignment completion
22 nd June	<ul style="list-style-type: none"> Ecosystems A biome is a large ecosystem. The Earth has many different biomes, with each one containing many different living organisms that have adapted to the environment. Tropical rainforests contain far more species of plants and 	<p>To know the location and characteristics of the major global biomes.</p> <p>To know where Tropical Rainforests (TRF) are located.</p> <p>To know the characteristics of a TRF.</p> <p>To understand the advantages and disadvantages of deforestation in the TRF.</p> <p>To know where hot desert biomes are located.</p> <p>To know the characteristics of hot desert biomes.</p> <p>Global biomes https://www.bbc.co.uk/bitesize/guides/zpmnb9q/revision/1</p> <p>Tropical rainforest (TRF) biomes https://www.bbc.co.uk/bitesize/guides/zpmnb9q/revision/1</p> <p>Hot desert biomes https://www.bbc.co.uk/bitesize/guides/znxsgk7/revision/1</p>

	<p>animals than any other biome. They are home to many resources, but deforestation could result in negative impacts to the planet.</p> <ul style="list-style-type: none"> Deserts are dry, arid areas that receive very little rain. Deserts can be hot or cold. Most hot deserts are found on and around the tropics. 	
Development		
Week Commencing	Learning	Assignment completion
29 th June	<ul style="list-style-type: none"> Development Geographers use social, economic and political indicators to measure development in countries throughout the world. Developed countries have better standards of living than less developed countries. 	<p>To know the different development indicators that are used to measure development.</p> <p>To understand how the quality of life differs around the world.</p> <p>To know the different factors which affect development.</p> <p>https://www.bbc.co.uk/bitesize/guides/zvp39j6/revision/1</p>
Natural hazards – Plate tectonics		

Week Commencing	Learning	Assignment completion
6 th July	<ul style="list-style-type: none"> Natural hazards Tectonic plates are pieces of the rocky outer layer of the Earth known as the crust. These plates are constantly moving, and volcanoes and earthquakes are found at plate boundaries. Fault lines are located in many parts of the world and are closely related to the structure of the Earth. It's important to understand the causes, impacts and responses to this tectonic activity. 	<p>To know the structure of the Earth.</p> <p>To understand how and why tectonic plates move.</p> <p>To know the cause, effects and responses to earthquakes.</p> <p>Plate tectonics https://www.bbc.co.uk/bitesize/guides/zyhv4wx/revision/1 </p> <p>Earthquakes https://www.bbc.co.uk/bitesize/guides/z3sg87h/revision/1 </p>
Natural hazards – Tropical storms		
Week Commencing	Learning	Assignment completion
13 th July	<ul style="list-style-type: none"> Tropical storms often known as hurricanes, cyclones or typhoons bring with them a path of destruction. Hurricanes often form in warm places, 	<p>To know how tropical storms form.</p> <p>To know the effects and responses to tropical storms.</p> <p>Tropical storms https://www.bbc.co.uk/bitesize/guides/zrv4jxs/revision/1 </p>

	over the tropical seas.
