Year 10 - Psychology - Term 6 - Curriculum Overview

	<p>Link to Video</p>	<p>Task four: Complete the apply-it question Eli's AA experience Extension: page 243 read and answer the questions</p> <p>E Extension A study from the Cochrane Review</p> <p>One of the studies in Ferri et al.'s (2006) Cochrane Review was carried out by Diana Walsh and her colleagues (1991). They studied workers at a large factory in the US. 371 workers were identified as abusing alcohol to the extent that it was interfering with their work. Of these, 227 consented to take part in the study. They were randomly allocated to one of two treatments for alcoholism. One was a hospital-based programme (73 participants). The other was a 12-step Alcoholics Anonymous programme which lasted one year. Data was collected from each participant by face-to-face interviews at the start of the study, and again after six and 12 months. Many variables were measured, but one of the most important was the proportion of participants reporting they had not drunk alcohol at all since the last interview (no drinking). The results relating to this variable are shown in the table.</p>
<p>Week 5 beginning 29th June</p>	<p>Revision- Addiction</p> <p>In this lesson you will be preparing for your end of topic test on addiction. You will assess your knowledge and make complete activities to help you embed and refine your knowledge</p>	<p>Preparation for end of topic test Task one: Complete the multichoice quiz Task two: Read over your notes and complete the knowledge organisers Task three Complete the revision tasks Task four: redo the multichoice quiz and close any gaps</p>
