20th July 2021

Dear Parents and Carers,

Although Government guidance has changed and we have no statutory duty, with the use of the NHS Track and Trace app and home testing kits replacing the notification from schools. We are informing you of the confirmed case as part of our duty of care and a matter of courtesy and infection control. We strongly advise that you continue to take Lateral Flow Device Tests, monitor any systems your child might develop and follow the NHS Track and Trace App.

[Coronavirus \(COVID-19\): guidance and support - GOV.UK \(www.gov.uk\)](https://www.gov.uk/guidance/coronavirus-covid-19-guidance-and-support)

This morning, we were made aware that a Year 7 student has tested positive for COVID-19 via a "at home" Lateral Flow Test taken this morning (20th July 2021). The individual is now taking a PCR test to confirm the result.

We have followed all the national guidelines from the Department for Education and worked quickly to identify students and staff who may have been in 'close contact' with the affected individual; consequently, they will need to self-isolate. **If you have received this letter, this means that your child does not need to isolate.**

We have contacted these families individually. Cleaning regimes for the Year 7 area and areas of transition will be maintained as normal.

Those identified to be 'close contacts' by Public Health England have been advised to isolate until Saturday 31st July 2021, this is in accordance to when symptoms were identified.

Unless you have been contacted separately, your child will not need to self-isolate as they are not a close contact.

I can only apologise for the disruption and anxiety that these decisions cause but assure you that it has only been made in the best interests of our students' safety and wellbeing.

Please also find attached further guidance from Public Health England and the Department of Education.

If you have any further questions, please do not hesitate to contact the Academy.

Yours sincerely

Mr S. Underwood
Principal

Guidance

Guidance for contacts of people with confirmed coronavirus (COVID-19) infection who do not live with the person

<https://www.gov.uk/government/publications/guidance-for-contacts-of-people-with-possible-or-confirmed-coronavirus-covid-19-infection-who-do-not-live-with-the-person>

What to do if your child develops symptoms of COVID-19:

- People who do not have symptoms should not request a test unless this has been specifically requested by Public Health England or the local authority.
- All other household members who remain well must stay at home and not leave the house for 10 days. This includes anyone in your 'Support Bubble'.
- The 10-day period starts from the day when the first person in the house became ill.
- Household members should not go to work, school or public areas and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.
- Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community.
- If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119.
- If you are able to, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

Please see the link to the PHE 'Stay at Home' Guidance:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

Symptoms of COVID-19

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness

If your child does develop symptoms, you can seek advice from the nhs.uk website at

<https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
